

Install Nmap in Windows

NMAP Installation in windows: nmap is support in Windows operating system, but it's recommended to run in Linux system.

Download Nmap: Go to URL: <https://nmap.org/download.html> and Windows binaries

Microsoft Windows binaries

Please read the [Windows](#) section of the Install Guide for limitations and installation instructions for the Windows version of Nmap. You can choose from a self-installer (includes dependencies and also the Zenmap GUI) or the much smaller command-line zip file version. We support Nmap on Windows 7 and newer, as well as Windows Server 2008 and newer. We also maintain a [guide for users who must run Nmap on earlier Windows releases](#).

Note: The version of Npcap included in our installers may not always be the latest version. If you experience problems or just want the latest and greatest version, download and install the [latest Npcap release](#).

The Nmap **executable Windows installer** can handle Npcap installation, registry performance tweaks, and decompressing the executables and data files into your preferred location. It also includes the Zenmap graphical frontend. Skip all the complexity of the Windows zip files with a self-installer:

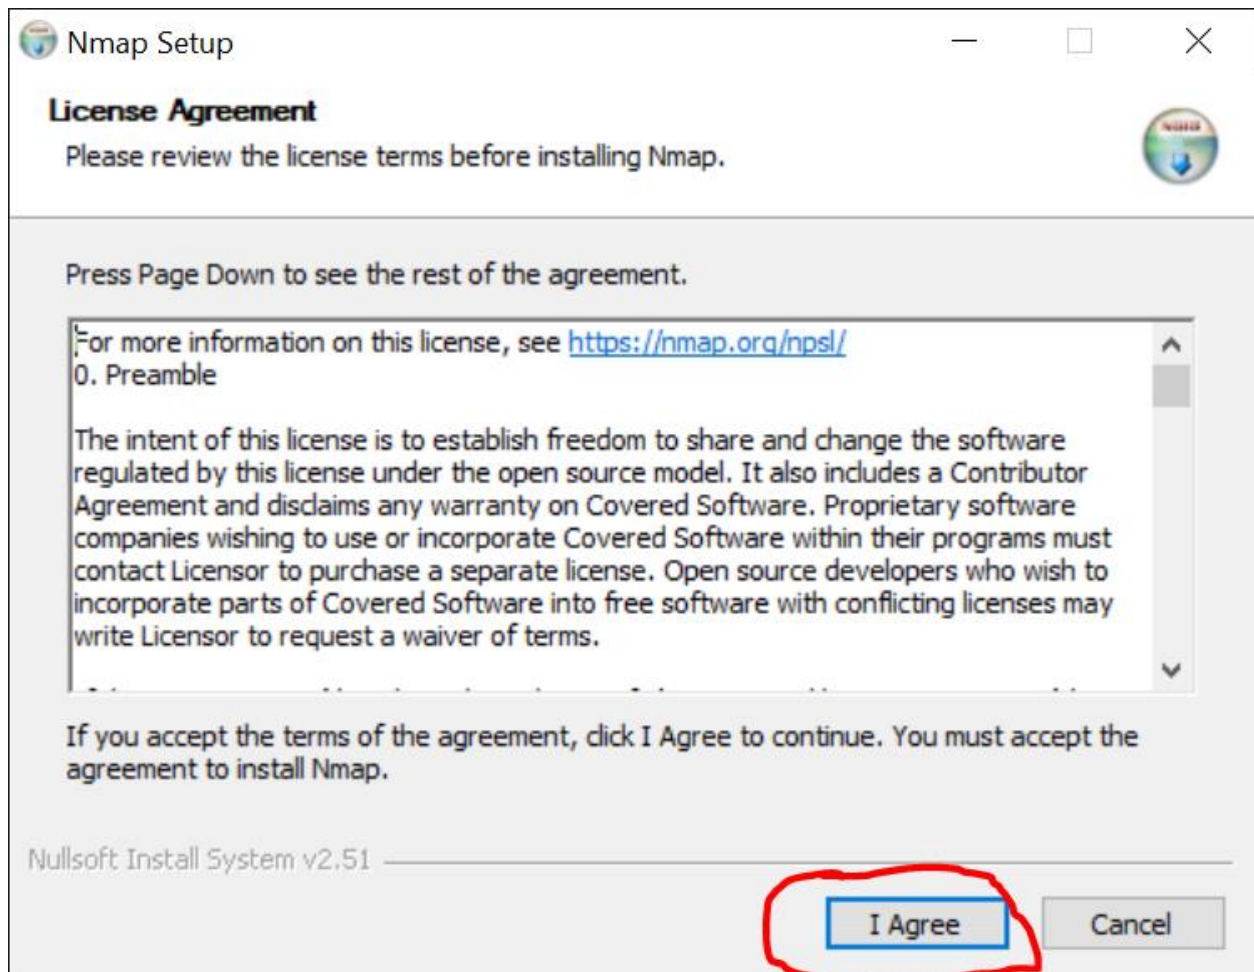

Latest stable release self-installer: [nmap-7.91-setup.exe](#)
Latest Npcap release self-installer: [npcap-1.31.exe](#)

We have written [post-install usage instructions](#). Please [notify us](#) if you encounter any problems or have suggestions for the installer.

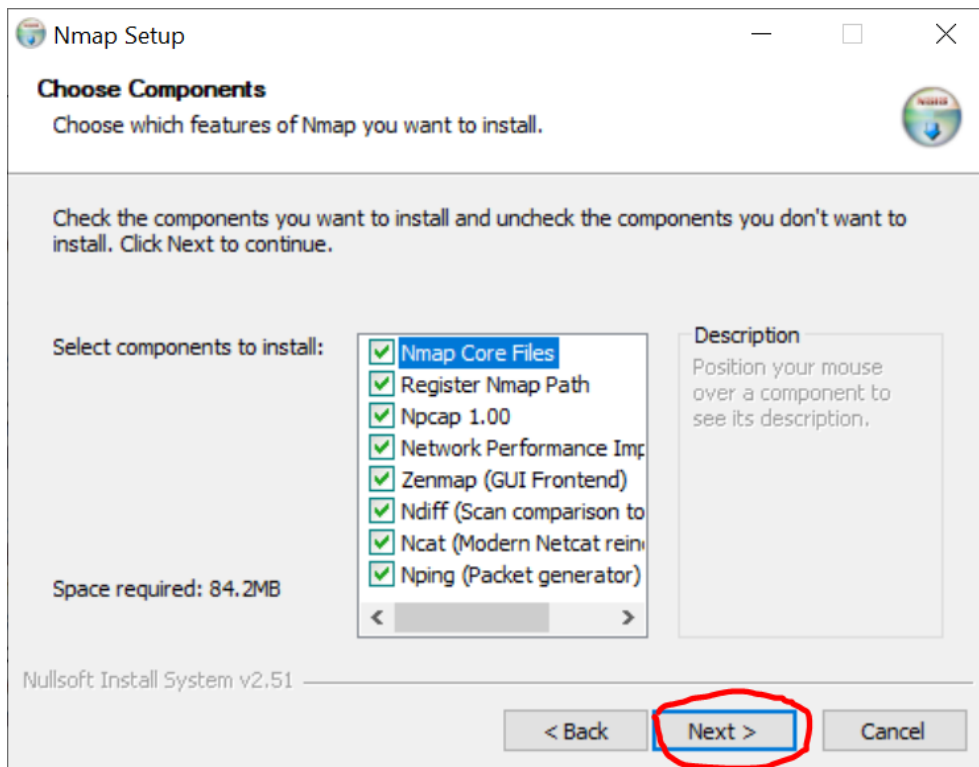

For those who prefer the command-line zip files ([Installation Instructions](#); [Usage Instructions](#)), they are still available. The Zenmap graphical interface is *not* included with these, so you need to run nmap.exe from a DOS/command window. Or you can download and install a superior command shell such as those included with the free [Cygwin](#) system. Also, you need to run the [Npcap](#) and [Microsoft Visual C++ 2013 Redistributable Package](#) installers which are included in the zip file. The main advantage is that these zip files are a fraction of the size of the executable installer:

Latest stable command-line zipfile: [nmap-7.91-win32.zip](#)

After download, run the nmap-xxx-setup.exe file

Keep default and click next

Click on install:
